Summary

I'm Full Stack Web Developer interested in continuous learning
and happy programming and productivity being in the zone. I'm
a proactive person with huge abilities for research and problem
solving. I like to bring added-value solutions to enterprise/customers
problems & needs. I like team work and I'm always learning new
things and sharing it with people around me.

Previous experiences includes development/customization of ERP,
PMS, HIS, Electronic Invoice Management and Transportation
Planning System.
